

# Natanael Log

Computer Engineering Student

📍 Linköping, Sweden

## Hi

I'm Natanael, a 24 year old engineering student currently in my fourth year of studies. I'm expecting to be finished summer 2018. I have 6 years of summer work experience at Ericsson and Tieto. Most recently, at Tieto, I developed a web platform to monitor data sent through the cloud. I also initiated automated testing on the platform as well as on the back end API. During fall 2016 I worked 20 % extra on top of studies. I have 5 years of summer work experience at Ericsson in Kumla. I've worked there as an SMT operator and a production planner.

About myself: married to Sara, great at drums and guitar and love cooking. I'm a great teamplayer and most of all a fast learner. Although my freshest software experience is of web I have studied both low and high level programming and have good knowledge in most of the classic languages such as C, C++, Java and Javascript.

I hope you find my profile interesting and I would love to hear more from you. Please read my resume for more detail of my skills, education and experience.

Best regards,
